-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3653

1. The indicated allowability of claims 11 through 15 is withdrawn in view of the newly discovered prior art to Slapin et al. A rejection employing this prior art follows. Any inconvenience as a result of the delay in applying the above mentioned prior art is regretted.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 11 through 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Taub in view of Buttery et al and Slapin et al.

Taub teaches everything except a removable perforated section in two of the faces of the body and the package comprising a base having a perimeter on which a plurality of polyhedral bodies are arranged.

Buttery et al teaches providing a removable perforated section 21 in two faces of a dispensing body.

In view of the teachings of Buttery et al, it would have been obvious to one of ordinary skill in the art to provide Taub with a perforated removable section in two of the faces of the body of Taub in order to seal the dispensing opening until ready of use.

Art Unit: 3653

Slapin et al teaches providing a base for receiving a plurality of polyhedral bodies making up dispensing containers. See Figures 1 and 2 for base 1 and containers 3.

It would have been obvious to one of ordinary skill in the art to provide a base to receive plural polyhedral bodies comprising dispensing containers of the Taub-Buttery et al construction in view of the teachings of Slapin et al. This provides the advantage of compact storage of the dispensers.
